- Excellent written and oral communication as well as strong organizational skills.
- Proficient with Microsoft Office software, including Word and Excel.
- Excellent interpersonal skills.
- Attention to detail and strong work ethic.
- Ability to work independently and solve novel problems.

**Job Summary:**

The Educational Neuroscience Lab explores questions at the intersection of education and neuroscience, in the emerging field of Educational Neuroscience. Our research examines the neural underpinnings of cognitive processes that are relevant for education, and the role of educational experiences and enculturation as primary drivers of brain plasticity to create the neural circuits that underlie human specific abilities. This position will be involved in managing a research project conducted within the Educational Neuroscience Lab exploring the development of fractions knowledge in 2nd - 8th grade children. This position will be responsible for providing technical assistance to research projects in the lab, such as conducting tests, interviews and questionnaires with participants and to manage and perform administrative tasks.

For a complete list of duties and qualifications please see:

We offer an excellent benefits package as well as a competitive salary based on qualifications.

**How to Apply:**
