Post-Doc Training Position

The Rosengren Lab (PI: Karl S. Rosengren) at the Waisman Center, University of Wisconsin-Madison is looking for a postdoctoral researcher to work on a NSF-funded research investigating the role of visual representations in children's learning about biological variability. This research is in collaboration with Dr. Martha W. Alibali and Dr. Chuck Kalish.

Title: Research Associate
Salary: $48,432 (minimum)
Percent Time: 100%
Application Deadline: February 28, 2019
Anticipated Start Date: ASAP

Required/Preferred Experience:
A PhD in Science Education or a related field is required.

Knowledge of human subjects' research and experience conducting research with school-aged children is required; expertise in biological education is preferred.

The ideal candidate will have experience in using qualitative and quantitative research methods and analysis approaches, and experience in conducting research in schools and/or museum settings.

Job Duties:
The postdoctoral researcher will be involved in the design and implementation of research studies examining how different types of visual representations influence school-aged children's learning and generalization about biological variability.

The individual will be responsible for the day-to-day oversight of the project and will be involved in training the graduate and undergraduate research assistants who will be helping on the project. This individual will also play an integral part in developing workshops and implementing workshops at a local children's museum.

To apply, please email a cover letter, CV, and contact information for three references to Dr. Karl S. Rosengren at krosengren@wisc.edu.

If you have any questions regarding this position you may contact Dr. Rosengren directly.

Review of applications will begin immediately and will continue until the position is filled.
